Students enrolled in this program learn vocabulary and expressions used mainly in the business process as well as the fundamentals in creating presentations, conducting meetings, negotiating deals, and drafting documents (e.g., business letters) in English. **Learning Goal:** CIA takes pride in how our teaching method helps students learn English, especially with the Business English course. We make sure students leave CIA with a deep grasp of the language in business context, and are able to execute their learning in the real world of business.
